Emirates Rawabi and ReFarm Global unite to transform agriculture and landscaping in the United Arab Emirates (UAE)

Report Problem

In a landmark step toward transforming the UAE's agricultural and food production landscape, Emirates Rawabi PSC (www.EmiratesRawabi.ae), one of the nation's leading integrated agribusiness groups, has entered into a strategic partnership with ReFarm Global Investments LLC (https://ReFarmTheWorld.com), a pioneer in regenerative and circular sustainability technologies. This collaboration is set to revolutionize not only the UAE's food production systems but also change the landscaping industry, establishing a new benchmark for sustainable urban and agricultural growth across the region.

Together, they will drive a new model of circular agribusiness, creating cost-efficient, carbon-conscious, and regenerative solutions to strengthen food security, enhance soil health, and drastically reduce water use across the UAE's farming and food production systems. Beyond agriculture, this initiative will also extend its impact to urban environments and landscaped areas, supporting sustainable living and greener communities. In line with the leadership's vision to make Dubai the most beautiful, advanced, and liveable city in the world, this collaboration will help develop a sustainable master plan for urban greening, improve irrigation efficiency, reduce the urban heat island effect, and enhance the sustainability of Dubai's parks and green ecosystems. It will redefine the landscaping industry for future developments, promoting eco-efficient design, reduced water consumption, and the creation of resilient green spaces that align with the UAE's long-term vision for a sustainable and regenerative future.

A partnership for the future of food

This collaboration combines Emirates Rawabi's extensive expertise in dairy, poultry, feed, and food production with ReFarm's breakthrough technologies in agricultural waste-to-value systems, regenerative soil enhancement, and air, soil, and water optimization. The partnership aims to create a sustainable food ecosystem that regenerates rather than depletes, by improving soil vitality, optimizing resources, and ensuring food production that is both economically and environmentally efficient.
